

Biomedical Devices of Kansas Selects New President

Kansas City, Kansas, USA, April 25, 2019 – Biomedical Devices of Kansas today announced that Keith Baird has been selected as the new President of Biomedical Devices of Kansas. Baird succeeds Bill Graveman, who will assume the role of CEO of Biomedical Devices of Kansas. Graveman will also continue his responsibilities as Vice President of Engineering and Development for Novian Health.

Prior to his role as President, Baird served as Vice President of Sales. During his tenure as Vice President, Baird proved his capabilities in sales and led the expansion of the pharmaceutical-support areas in the facility to enhance services and capabilities to clients.

“As our Vice President of Sales, Keith proved himself to be a key employee who shares the values and ethics of the owners of the company,” shared Graveman. “He brought a new energy and vision to Biomedical Devices of Kansas—one that will ensure the continued growth of Biomedical Devices of Kansas under his leadership as President. The Board of Directors feel that Keith is a perfect fit to lead the future growth of the company.”

As President, Baird will assume the responsibility for the daily operations of Biomedical Devices of Kansas, in addition to sales and business development responsibilities.

“I can think of no one better to lead the future of Biomedical Devices of Kansas. Keith’s experience as Vice President of our company, combined with over 35 years of industry experience in manufacturing and product design and development in both ISO and FDA environments—and his strong core values—make Keith the perfect choice to lead the company into the future,” said Graveman.

“I am honored and excited to have been selected as the next President of Biomedical Devices of Kansas,” said Baird. “I look forward to growing Biomedical Devices of Kansas into a strong partner with the region’s growing biomedical presence and providing the necessary services to both startups and established companies.”

“We are an organization led by a purpose—to make a positive, meaningful impact to everyone Biomedical Devices of Kansas touches,” Baird continued. “I will do my best to continue serving our clients as their business accelerator to enable them to fulfill their passion and make a difference for emerging medical device and pharmaceutical companies.”

Biomedical Devices of Kansas, LLC—Biomedical Devices of Kansas is an FDA-compliant facility which provides services to the medical device industry with engineering services in the development of medical devices including regulatory strategies and submissions, and contract manufacturing. Biomedical Devices of Kansas also provides FDA-compliant clean room facilities for the pharmaceutical industry.
